

## Security advice

Eickmann sensors are not to be used for safety applications in which safety of persons depends on proper operation of the instruments (except safety light curtains).

Only qualified personal may assemble and connect in force of regulations and in voltage-free condition. For assemble the machines and devices have to save and respectively switch off. The operator of the higher ranking complete system is responsible for the compliance by consideration of the national and international operation, safty- and accident regulations and rules of prevention like

- > EN 292 safty of machines, general principles
- > EN 60204 electrical equipment of machines
- > DIN 57100 part 410 guard against dangerous currents

Eickmann sensors comply national, international and european standards and they are produced under DIN ISO 9001.

Errors and omissions excepted!
